

Project status

- This project will improve safety and efficiency for road users on the stretch of State Highway 16 between Brigham Creek and Waimauku in Auckland.
- Stage One construction is underway and scheduled for completion in January 2026.

Out of scope

Median barriers

- Following a review of the safety interventions for Stage One, NZTA has decided to phase the safety improvements between Huapai and Waimauku.
- The project will complete in this first phase widening bridges, creating wider road shoulders, installing the turnaround bays and installing a flush median. This decision addresses the concerns we have heard from the community about property access and local travel impacts.
- These interventions will improve the safety and efficiency of the corridor by creating more separation between lanes. NZTA will continue to assess and monitor safety and efficiency along the corridor. The upgrades being completed now will provide space for additional safety interventions in the future.
