[image002.png](#)

Hi Rex/Lucie

With the C&E Plan ([202503 Median Barriers Plan.docx](#)), KM/FAQ document and Min Weekly insert completed I've been working on the collateral for the SH16 announcement next week. Here are links to various collateral items – most of it is rinse and repeat with subtle changes for each audience but if you could review and approve that would be much appreciated. NB I'm still working on the webpages updates and will have this through as soon as possible.

Rex – as mentioned I'm not sure how much of this Stephen wants to see given it's pretty much the key messages he's approved already. Can you please send through to him what you think he needs to sign off and let me know. Thanks

Kia ora

Following a review of the safety interventions for Stage 1 of the SH16 Brigham Creek to Waimauku improvements project, Waka Kotahi has decided not to proceed with the installation of median barriers between Huapai and Waimauku. This decision addresses the concerns we have heard from the community about property access and local travel impacts.

The project will complete widening bridges, creating wider road shoulders, installing the turnaround bays and installing a flush median (i.e. white diagonal lines in the middle of the road to create a safe area). These interventions will improve the safety and efficiency of the corridor by creating more separation between lanes.

We'll continue to monitor and assess safety and efficiency along the corridor. The upgrades we're completing now will provide space for additional safety interventions if required in the future.

Waka Kotahi has determined this approach appropriately balances travel impacts for local journeys and safety for all road users.

For more information on the project please see our [website](#). If you have any questions, please let me know.

Ngā mihi

Rex
